

SHIFT CABLE ADJUSTMENT 150cc UNITS

- 1) Place the shift lever in forward.
(Note: In the picture at right the rear of unit is to the left and the front on unit is to the right.)

- 2) On the side with the shortest cable (left in above picture) tighten the top nut down finger tight, then with a wrench turn the nut until it is tight.

- 3) Shift the shift lever to reverse.

- 4) On the side with the shortest cable (right in the above picture) tighten the top nut down finger tight, then with a wrench turn the nut until it is tight.

- 5) Shift the shift lever to neutral and ensure both cables are tight with no slack. Tighten both bottom nuts.
